

Adult social care

The data story behind residential, domiciliary and nursing care for the elderly and other vulnerable adults.

A. What does it cost?

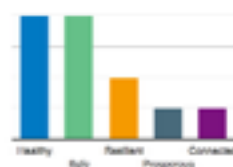

Revenue expenditure on social care per head 2013/13 raw value
Source: LGInform

B. Is it affordable?

Forecasting the tipping points, a variant on the **Barrel Graph of Doom**.
(Very approximate figures used here for illustration).

C. Is it a priority?

Is this an investment priority? Does it link to our most important strategic drivers? The service is scored by how strongly it contributes to each priority; the highest score for a one-to-one relationship, and the lowest score for a very tenuous weak link or no link at all.

D. Who is affected?

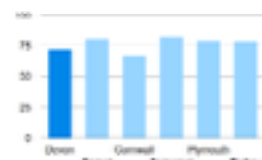

Showing which population groups are our stakeholders for this service: how strongly are they affected, and how well do we consult or co-design with them?
The larger the bubble, the greater the percentage of Devon's population in that group.
Click on any bubble to see the details.

E. KPI 1 - Are we effective?

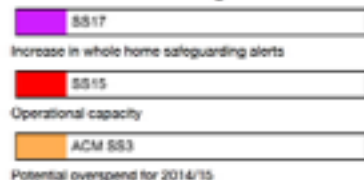

Permanent admissions of older people (aged 65 and over) to residential and nursing care homes, per 100,000 population 2013/14 raw value
Source: LGInform

F. KPI 2 - Are we effective?

Timeliness of social care assessments 2009/10 raw value
Source: LGInform

G. What are the big risks?

The risks relating to social care that currently sit at the top of the risk register for this area. Risks are scored and prioritised by likelihood and by impact to give a 'Risk Score'.

H. KPI 1 - Are we improving?

Permanent admissions of older people (aged 65 and over) to residential and nursing care homes, per 100,000 population
Source: LGInform

I. KPI 2 - Are we improving?

Timeliness of social care assessments
